

Your windows will

SPARKLE

There is no simpler way to improve the look of your office, shop or restaurant than a quick window cleaning. No one wants to step out into the frigid Chicago winter air to keep the windows sparkling. Now that the snow has melted, feel the sun's warmth, and look out at spring flowers through clean windows.

Wipeco's Easy Window Cleaning Tips:

Step 1: Choose a dreary day.

Cleaning your windows on a cloudy day gives you the best results. The warmth of the sun can cause the cleaner to dry too quickly, leaving behind streaks that the sunlight makes difficult to see.

Step 2: Dirt Removal

To ensure a quality shine and to eliminate more work later, take a cloth or small brush and wipe down the sill, pain, screens and track. Complete this step for both the inside and the outside of your windows. Remove any cobwebs and loose dirt by wiping or brushing them out of the area. Skip this step and you're risking a mess later! Loose dirt can stick to your wiping cloth and smear the glass.

Step 3: Check the Screens

If the window you're cleaning has screens, it's a great idea to remove the dirt from those as well. Looking for an easy solution? Use the hose attachment to your vacuum to quickly remove loose dirt trapped in your screen.

Step 4: Sparkle Time

Spray the inside of your windows with the glass cleaner, leaving a fine mist. Use a lint-free soft cloth or a squeegee to wipe the window horizontally, in even strokes from top to bottom. Repeat on the outside, wiping vertically. (Wiping in opposing directions increases your ability to view streaks and buff them away).

Wipeco Recommends
**Clearly The Best
Glass Cleaner**
Item #0953

Tools:

You'll need (based on window size):

- **Glass Cleaner**

#0953 Clearly The Best

- **Lint Free Wipers**
